

PICTURE PERFECT

Your art should speak to your heart. Don't choose pieces that match the room, choose pieces that sing. Photography is a sadly overlooked art form that can dazzle and delight in equal measure, bringing hot colours or cool shades to your space, and adding more than a hint of your personality. *A-Frame House (2017), a photograph by Matt Stock, £3,193.98, artfinder.com*

CLOCKING ON

Far from purely functional, a wall clock can stand for itself as the centrepiece for an otherwise empty wall. Or get creative and build it into a carefully curated gallery wall of artwork and photos collected from your favourite places – after all, time waits for no man and every moment should be spent wisely. *Gold pleated clock, £48, audenza.com*
